

Subject: Communication systems

MYLIFT s.r.o. would like to introduce you to a new type of communication system capable of satisfying every client demand. The system is multipurpose, universal and easy to install and program.

1. Communication systems for booths only (fixed line)

A system enabling a person who activates the telephone device within a booth to connect to the call-center with the press of an alarm button. The system carries its own battery with various warning systems in case of faulty operation, the device can be installed externally or integrated into the control panel.

The total includes assembly and programming

6'500 CZK

2. GSM system

A system that enables using a common SIM card for creating a signal compatible with various communication system models.

The total includes assembly and programming

3'800 CZK

3. Complete communication system

(in compliance with valid standards for new elevators)

The system enables communication from within the cab and between the cab, cab ceiling and machine room.

The total includes assembly and programming

12'200 CZK

The amount above applies to the clients of MYLIFT s.r.o. If you are not a client, you can receive this price free of charge upon signing a minimum 3 year elevator maintenance agreement. Otherwise, send us your demand and we will get back to you as soon as possible.
